Multi-information display

Your vehicle is equipped with a multi-information display that presents various functions and settings.

The multi-information display is a touch screen. You can operate by touching the screen.

- Certain manual functions and settings are disabled or inoperable while the vehicle is in motion. You cannot select a greyed-out menu until the vehicle is stopped.

When the ignition switch is turned ON, the Notice message appears on the screen for a few seconds.

Read the Notice message, and then press the **ENT** switch or touch [OK] on the screen. After about 4 seconds, it will switch to the home screen.
